

## **Materials Workshop**

### **Safety Equipment**

**By Mary Hettmansperger**

Safety equipment –

Do not forget the safety attire when working!

Dust Masks, gloves, apron, safety glasses, earplugs, good ventilation, closed toed shoes, fire extinguisher and a clean and safe work area are all have-to-haves when working in metal and other Art and craft mediums. When first using a torch, read the precautions you should take when learning. Once you set up your area for working it is easy to get in the habit of working safe and smart.
