### Instructions:

1. Choose a photo and open it in Photoshop. Click on "Layer" and then select "Threshold." Move the slider to change the appearance of the photo as desired. Print the photo on plain paper.
2. Use a craft knife to cut out the black areas of the photo to create a custom stencil. If the photo is too difficult to cut, simply cut around it and we will collage it in.
3. Create a colorful background, combining printed collage tissue, writing/words, and lots of different colors. Try wiping paint on, stenciling, splattering. Let it dry.
4. Paint through your stencil with Black paint, or use gel medium to glue on your photo.
5. Add text with stamps or pens to complete your message.
