

Crystal Studded Sunglasses – Beth Simmons

Materials:

Sunglasses

Flat back crystal stones

Glue syringe

Crafting glue such as E6000

Tools:

Crystal pick up stick

Directions:

1. Attach an appropriate tip to the glue syringe.
2. Fill the syringe with a generous amount of glue.
3. Squeeze out any excess air that might be left in the syringe with the plunger.
4. Dot the glue where you want to apply your crystals. Note: only pre apply the glue for a few stones at once, you don't want the glue to start to dry before you can apply the crystal.
5. Using the crystal pick up stick, place your crystal stones.

Allow to dry completely before wearing.
